

Fire in electric cars

Usable in various situations

Follow step 1-3. After the fire blanket has been placed tight to the ground, wait 2-3 minutes and listen. If you can hear strong fuzz sounds about every 3-15 seconds, you have a thermal runaway. Leave the fire blanket on until the sound stops. This is a small fire that goes from cell to cell. The fire blanket will prevent the small fire from spreading elsewhere in the car.

1.

Call fire fighters!
Two people open the blanket and pull over the car

2.

Pull the blanket over the car

3.

Make sure all sides are closed around the car

4.

Step away from the car and wait for around 20min,

5.

Firefighters remove the blanket

Product information

- It controls any type of car fire within a few seconds
- A secure solution that handles fire in electric, hybrid cars as well as petrol and diesel powered engines
- Suitable for all vehicles, including SUVs
- Delivered in a smart bag or cabinet for mounting on the wall
- Reusable – up to 30 car fires

Size - 2x2m; 5x5m; 6x8; 7x10m

Weight - depending on a size, up to 3,5kg

Sustainable for

Underground carparks,
Shopping malls, Hotel
carparks
